

Ferguson Modular

FERGUSON
modular

The Ferguson Group

The Ferguson Group had its beginnings in Aberdeenshire, Scotland, over 30 years ago and today has grown to one of the world's leading suppliers of containers, accommodation and workspace modules and accommodation service vessels to the offshore energy industry, with many onshore applications too.

The main bases are Ferguson Seacabs Ltd in Scotland, Norway, Australia, Singapore and Dubai and Ferguson Modular Ltd in Scotland, Norway, Singapore and Dubai.

Today the Ferguson Group supplies high quality containers and modules around the world, working closely with partners in many areas, extending the global reach of the Ferguson name and products.

All our containers and modules are manufactured to DNV 2.7-1 standards and the Ferguson Group has pioneered the acceptance of these safety standards in every area in which it operates.

The Ferguson Group - global reach with service local to you.

Group Companies

Ferguson Seacabs

Ferguson Seacabs is one of the world's largest specialist providers of offshore containers, baskets, tanks and associated lifting equipment and has been servicing the offshore industry for over 30 years. The company operates a web enabled comprehensive Container Management System (CMS) which allows for the tracking of all containers, baskets, tanks, etc. throughout the global rental fleet. This enables the effective management of container testing and re-certification requirements, in accordance with DNV 2.7-1/EN 12079 and local regulatory requirements.

Ferguson Modular

Ferguson Modular provides a range of A60 DNV 2.7-1 offshore accommodation and workspace modules to the global oil and gas and renewable energy industries. Our product portfolio contains several designs for offshore accommodation modules along with workspace modules including offices, laboratories, test cabins, MWD and LWD cabins and coffee shops/tea shacks. Ancillary modules such as recreation rooms, gymnasiums, locker rooms, galley/mess rooms, laundry rooms and medic suites can be supplied to supplement larger accommodation complexes.

Ferguson Accommodation Service Vessels

The Group's first accommodation service vessel, ASV Pioneer, is a versatile offshore accommodation solution which is unique in the marketplace. Built to the highest quality and safety standards it offers unprecedented flexibility of accommodation configuration and a large open deck space capable of a multitude of uses to support the offshore oil and gas or renewable energy industries. ASV Pioneer has accommodation for up to 220 POB in well appointed en-suite rooms, and is complete with office, galley, mess, medical and recreational facilities, to provide an ideal living and working environment.

IceBlue Refrigeration Offshore, the most recent addition to the Ferguson Group, provides refrigerated containers to the offshore sector. All units are certified in accordance with DNV 2.7-1 and EN 12079 standards and are available from the Group worldwide bases. With short lead times, IceBlue Refrigeration Offshore's global fleet of refrigerated containers are offered in sizes from 2.5m to 6m units providing refrigeration and freezing solutions for offshore food transportation and storage.

Ferguson Modular Hire Division

Initial Enquiries and Tenders

When a customer contacts the Module Hire Division there is an experienced team of people on hand to provide a speedy response.

Our tracking system enables us to quickly check availability and provide an accurate timescale for delivery. Ferguson Modular has an excellent reputation for on time delivery of contracts large and small, and it begins here with efficient control systems.

Meeting Customer Needs

At Ferguson Modular our business development team is on hand to assist in the development of your project requirements. Our team can advise on the suitability of particular products for specific locations, and can often recommend more cost effective solutions. Requirements can be discussed and a production and/or deliver schedule developed to suit your needs. We have business development teams in key locations around the world, so contact Ferguson Modular to enjoy our unique level of customer service.

Delivery

Ferguson Modular's reputation for on time delivery is our own transport fleet, on hand to deliver modules to the quayside to meet scheduled vessels.

Installation and Hook-up Services

Ferguson modules are designed to make hook-up and commissioning straight forward and quick. Whether individual or multiple units, their design and construction to high DNV standards enables your own personnel or Ferguson engineers to install the units in the shortest possible time.

Customer Service 24/7

Ferguson accommodation and workspace modules have a reputation for long service and reliability, even when operating in some of the world's harshest environments.

This reputation is backed up with customer service available 24/7 anywhere in the world, whatever your time zone. We have engineers available to offer back-up for operations, maintenance and support.

Ferguson Modular - international service from an international market leader in offshore accommodation and workspace modules.

Manufacturing Division

Designed-in Excellence

The Inverurie manufacturing division of Ferguson Modular means that our products are built to the latest specifications and with control over the production process we can guarantee the quality of the end product and delivery schedules.

All Ferguson modules have the following qualities:

- A60
- DNV 2.7-1
- Light (15,000kg for the largest 10.3m fully serviced accommodation module)
- Smaller footprint – for tight deck spaces
- Strong – can be stacked up to four high
- Linkable/adaptable to form accommodation complexes
- Flexible interiors for accommodation and workspace modules
- NORSOK standards also available for the Norwegian market
- A variety of Zone 1, Zone 2 and safe area modules are available

From the wide standard range of module sizes, Ferguson Modular's unique 'customised standardisation' gives every customer the benefits of the standard module customised internally to their exact requirements. When hiring from our standard range we have a fit-out team ready to adjust internal layouts if necessary to suit your specific needs.

Quality Standards

Ferguson Modular benefits from the Ferguson Group's commitment to high standards of safety and quality across the international business and our HSEQ systems monitor and control standards very carefully. The company is certified to ISO 9001 and ISO 14001 for our environmental management systems and OHSAS 18001 for occupational health and safety.

All new A60 modules are manufactured at Inverurie to DNV 2.7-1 and EN 12079 standards.

Within the offshore energy industry the FPAL, Achilles and other performance assessment ratings are very important. Ferguson Group products enjoy excellent performance feedback and are the industry benchmark in a number of categories.

Skilled Workforce

Central to the success of every organisation is its workforce and at Ferguson Modular we have award winning apprentices to highly skilled crafts people who are long serving employees. We have skills in design, fabrication, fit-out, electrical engineering, HVAC engineering, procurement and process management. It is a growing workforce with plans to expand to meet increasing demand around the globe.

Ferguson Modules in Action

The standard range of Ferguson modules includes:

- Accommodation modules to sleep 1, 2, 3, 4, 8 people
- Accommodation complex units including galleys, mess rooms, locker rooms, gymnasiums, recreation rooms, medic suites and laundry rooms
- Workspace modules in 10.3m, 7.6m, 6m, 4.8m, 4.5m and 4m lengths with configurations including offices, laboratories, coffee shops/tea shacks, LWD/MWD/test cabins etc.

Modules can be standalone or linked/stacked (up to four high) to form multi-module complexes.

Research and Development

Although Ferguson Modular accommodation and workspace modules are built to the highest standards there is a policy of research and development to ensure that our units remain the highest quality available.

Design, construction methods, safety standards, materials, equipment, technology, interiors are all under constant review with our staff, our customers and their employees.

Structural Integrity New structure design incorporates

- Full compliance with DNV lifting sling specification
- Blast rating
- Excellent structural strength for stacking up to 4 high and for overall safety
- Added flexibility of footprint requirement as overhang is possible
- 15 tonnes fully equipped

Safety First Safety is paramount – with the Ferguson Programmable Logic Controller (PLC) fire and gas detection system fitted as standard. This incorporates an easy access control panel and direct integration with the installation's own central controls.

Air Conditioning Standard With the Ferguson advanced, integrated split air conditioning system fitted as standard these modules are suitable for the widest range of global environments. This advanced air conditioning system can be separately controlled in each cabin area for individual comfort.

Underfloor Heating The spacious and easy to keep clean 'en-suite' facilities have underfloor heating for fast drying. This increases safety and comfort for personnel.

Flexibility The industry leading, Ferguson designed link corridor system offers maximum flexibility, with easy linking to form integrated accommodation areas and multi module complexes. For multi storey (up to 4m high) complexes linking stairwells are also available.

Fast Hook-up A major benefit of the new Ferguson modules is the quick and easy hook-up capability, which means that the units can be in full operation soon after arrival using the installation's own services.

Optional Cabin Layouts

Quiet and Comfortable The comfortable living quarter facilities exceed HSE guidelines for space, and include high quality mattresses (which our research confirms is an important factor for offshore workers), secure lockers, comfortable seating and excellent sound insulation for 24 hour sleeping ability.

Designed for Quality Integrated internal design with high quality fittings and contemporary colour schemes means that temporary living quarter (TLQ) standards in Ferguson modules exceeds most permanent living quarter (PLQ) standards.

The Inside Story of the Ferguson Accommodation Module

Living with Ferguson Modular

The tough exterior of the Ferguson module range encloses a package which is the most advanced of its kind available today. The design team has carefully considered the needs of everybody concerned - the safety, security and comfort of the personnel, the footprint space, weight and hook-up capability for rig and vessel managers, the transport and lift for the carriers and the overall value for money.

The result is a package which is world leading. Here we show some of the highlights of the modules but seeing is believing and you are strongly encouraged to come and have a look at a Ferguson module for yourself.

'Customised Standardisation'

Ferguson Modular has coined a phrase which sums up its module range. Offshore requirements for every client are based on our standard module range – 10.3m, 7.6m, 6m, 4.8m, 4.5m, 4m. They are all built to the same exacting standards with DNV 2.7-1 / EN 12079 certification, and they all have the full range of Ferguson features available. However, within this standard range and because the modules are built at our Inverurie base, we can 'customise' modules to suit the special needs of clients. 'Customised standardisation' therefore gives you all the benefits of the high quality 'standard' Ferguson module range, but adapted to any special requirements of your own ...an ideal solution.

Ancillary and Workspace Modules

Ancillary modules can be supplied to supplement the accommodation modules for larger POB (persons on board) complexes. Based on the Ferguson standard module range these ancillary services allow us to deliver fully self contained, standalone complexes. They are all stackable and interlinkable in any configuration to suit the footprint available.

Mess

Configured to provide flexible or fixed seating to accommodate up to 28 personnel per 10.3m module. Optional self service facilities can also be provided.

Galley

Galleys can be supplied with full marine specification stainless steel catering equipment, including bain marie/servery equipment, hot plates, ovens, dishwashers, cold/freezer stores, dry stores, sinks and fire suppressant system.

Freezer/Chiller/Dry Store

Freezer/chiller/dry store units can also be provided.

Recreation

Comprises units equipped with soft seating, TV's, lounge storage, furniture, internet points.

Gymnasium

10.3m module equipped with various cardio-vascular gym equipment, sauna, wet unit, shower facilities, lockers and bench seating/changing facilities.

Medic Suite

The medic suite comprises a medic room complete with medic couch, sink, fridge, lockable storage cabinet and medic office facilities - desk, cupboards and filing cabinets. The suite also contains a recovery room with two beds and wet unit facility.

Laundry

Fit-out comprises commercial washers and driers, linen storage and preparation area, laundry baskets.

Locker

Locker/toilet/wash modules fitted out with full or half height lockers, bench seating, hand washing facilities, toilet facilities.

Office

Can be configured from single person executive to multi-person operation (up to 12). Fit-outs comprise desks, operators' chairs, filing cabinets, storage space, power/telephone/IT cabling pre-installed. Also available to NORSOK standards.

Laboratory

Can be fitted with stainless steel worktops, sinks, chemical storage cupboards, fume cabinets, storage cupboards etc. Also available to NORSOK standards.

LWD/MWD/Test Cabin

Can be configured as required including adjustable height worktop, operators chairs, document storage, wall cupboards, multiple cable transits, data racks. Also available to NORSOK standards.

Coffee Shop/Tea Shack

Complete with bench seating, tea/coffee making points, hot water boilers and sink/cupboards (can be smoking or non smoking).

Project Delivery

- Installed and commissioned two 4 person 10.3m A60 accommodation modules
- All modules fitted with en-suite facilities including under floor heating in wet units, bunk beds, desk and seating areas, high quality fixtures and fittings and contemporary colour schemes
- Climate control HVAC system
- PLC (Programmable Logic Control) based fire and gas detection system
- Designed and manufactured in-house to ISO 9001, 14001 and OHSAS 18001 using standard Ferguson designs
- Certified to DNV 2.7-1

Project Profiles

Projects for Ferguson A60 DNV 2.7-1 accommodation and workspace modules vary in size from single units - our standard range or especially adapted - to multiple unit stacked and linked complexes. Our module range is versatile and whilst the majority are used offshore there are many on-shore applications especially for workspace modules such as laboratories, workshops, offices and freezer/chiller units. The following examples show the versatility of Ferguson Modular in fulfilling specific customer requirements.

Project: KBR for BP Miller

Search and Rescue (SAR) Helicopter Operations Complex

Installed and commissioned four 8m A60 bespoke modules to form a Search and Rescue (SAR) helicopter operations complex. The complex, comprising operations centre, crew room and two workshops, was a key element of BP's Jigsaw project to enhance offshore rescue and recovery capability from the platform.

Project: BP Magnus

Safety Markings

These strikingly visible 10.3m units for the 16 person accommodation complex on board BP's Magnus platform are painted in high visibility safety markings as they are positioned close to the platform's helipad.

Project: Noble Drilling

Limited Deck Space

Noble Drilling had limited deck space on the Noble Ronald Hoope jack-up rig. By utilising Ferguson Modular's standard 7.6m A60 DNV 2.7-1 accommodation and workspace units this allowed superior accommodation on a limited footprint with the interior customised to meet Noble's requirements.

Project: Hess

Lifting Capacity Constraints

Manufacture of four 4 person 7.6m A60 DNV 2.7-1 accommodation modules, designed to meet lifting capacity constraints, incorporating a single HVAC plant arrangement.

10.3m Accommodation Module

A60 accommodation offering safe and comfortable living space for 1, 2, 3, 4 or 8 personnel

Features

- Certified to DNV 2.7-1 / EN 12079
- 2 sets of bunk beds
- Lockers including hanging and shelving space
- En-suite shower rooms with underfloor heating
- Shower with integral hot water system
- Desk & workspace, including pin board and chair
- Air-conditioning unit with individual thermostatic control
- PLC based fire and gas detection unit
- Category II lighting, low brightness
- High quality fixtures and fittings
- Attractive relaxing decor and soft furnishings
- Quick and easy hook-up to onboard services
- Designed for easy stacking
- Manufactured in-house to ISO 9001, ISO 14001 and OHSAS 18001 standards
- Optional fire escape hatches replace windows if required
- Modules available for hire or sale

Typical 10.3m Accommodation Layout

Dimensions

A 10.3m x B 3.3m x C 3.3m

Weight

15,000kg fully fitted (typical)

Certification

A60 DNV 2.7-1 / EN 12079 certified design

7.6m Accommodation Module

A60 accommodation offering safe and comfortable living space for 2 or 4 personnel

Features

- Certified to DNV 2.7-1 / EN 12079
- 2 sets of bunk beds
- Lockers including hanging and shelving space
- En-suite shower room
- Shower with integral hot water system
- Desk & workspace, including pin board and chair
- Air-conditioning unit with individual thermostatic control
- PLC based fire and gas detection unit
- Category II lighting, low brightness
- High quality fixtures and fittings
- Attractive relaxing decor and soft furnishings
- Quick and easy hook-up to onboard services
- Designed for easy stacking
- Manufactured in-house to ISO 9001, ISO 14001 and OHSAS 18001 standards
- Modules available for hire or sale

Typical 7.6m Accommodation Layout

Dimensions

A 7.68m x B 3.52m x C 3.10m

Weight

12,000kg

Certification

A60 DNV 2.7-1 / EN 12079 certified design

6m Accommodation Module

A60 accommodation offering safe and comfortable living space for 4 personnel

Features

- Certified to DNV 2.7-1 / EN 12079
- Safe area / Zone 2 classification
- 2 sets of bunks per cabin
- Lockers including hanging and shelving space
- Shared en-suite shower room
- Desk & workspace, including chair
- High ambient air-conditioning unit with individual thermostatic control
- PLC based fire and gas detection unit
- Category II lighting, low brightness
- High quality fixtures and fittings
- Attractive relaxing decor and soft furnishings
- Quick and easy hook-up to onboard services
- Designed for easy stacking with ISO twist locks
- Manufactured in-house to ISO 9001, ISO 14001 and OHSAS 18001 standards
- Modules available for hire or sale

Dimensions

A 6.00m x B 2.44m x C 2.89m

Weight

10,000kg

Certification

A60, Zone 2, DNV 2.7-1 / EN 12079 certified design

Office Fitted with desks, shelving, drawers and supplied with office chairs, the space within this 10.3m workspace module was thoughtfully laid out to provide a comfortable office environment.

Coffee Shop/Tea Shack Fitted with storage units, sink and supplied with benches this 10.3m module provides a comfortable and relaxing area for up to 20 personnel.

10.3m Workspace Module

A60 workspace module providing a safe and comfortable working environment

Features

- A60 fire rated module
- Flexible internal layouts to suit your requirements
- Air-conditioning unit with individual thermostat control
- PLC based fire and gas detection unit
- Category II lighting, low brightness
- High quality fixtures and fittings
- Quick and easy hook-up to onboard services
- Designed for easy stacking
- Manufactured in-house to ISO 9001, ISO 14001 and OHSAS 18001 standards
- Modules available for hire or sale

Typical 10.3m Office Layout

Dimensions

A 10.3m x B 3.3m x C 3.3m

Weight

15,000kg fully fitted (typical)

Certification

A60 DNV 2.7-1 / EN 12079 certified design

Office Fitted with desks, shelving, drawers and supplied with office chairs, the space within this 7.6m workspace module was thoughtfully laid out to provide a comfortable office environment.

Galley Fitted with stainless steel catering equipment, cold/freezer stores, dry stores and sinks.

7.6m Workspace Module

A60 workspace module providing a safe and comfortable working environment

Features

- A60 fire rated module
- Flexible internal layouts to suit your requirements
- Air-conditioning unit with individual thermostat control
- PLC based fire and gas detection unit
- Category II lighting, low brightness
- High quality fixtures and fittings
- Quick and easy hook-up to onboard services
- Designed for easy stacking
- Manufactured in-house to ISO 9001, ISO 14001 and OHSAS 18001 standards
- Modules available for hire or sale

Dimensions

Certification

A60 DNV 2.7-1 / EN 12079 certified design

6m or 4.8m NORSOK Workspace Modules

Fully NORSOK compliant A60 workspace modules providing a safe and comfortable working environment

Features

- NORSOK compliant, A60 fire rated module
- DNV 2.7-1 / DNV 2.7-2 / BS EN 12079 certification
- Classified for Zone 2 Hazardous area (ATEX Ex II 3G, EEx v3 IIB T3) in accordance with BS EN 50381:2004
- CE marked
- ISO corner castings fitted top and bottom for easy stacking and interlocking
- Recessed pad eyes for ease of stacking
- PLC based fire and gas detection unit
- Zoned air conditioning (optional) compliant with noise level requirements
- A60 window and protection frame
- Design flexibility
- Height adjustable work surfaces
- Flexible internal layouts to suit working environment standards
- Plug & play hook up

Typical 6m Office Layout

Dimensions

- A 6.058m x B 2.438m x C 2.896m
- A 4.876m x B 2.438m x C 2.8m

Weight

Clients - Worldwide

Ferguson Modular has modules in operation around the globe. Many result from long standing relationships with client companies who have experienced the high standards of the Ferguson units and service and want to use them wherever they are operating. Others are the result of the spread of the Ferguson reputation for top quality, good service and recommendation by satisfied users of our modules. If you would like to learn more about how Ferguson Modular can help to fulfil your needs for offshore accommodation and workspace modules contact us today, we will be delighted to help.
