SUPPLY CHAIN MATRIX - HULL & HUMBER

Wind Energy Network

Hull & Humber Supply Chain Matrix

THIS MATRIX HAS BEEN DESIGNED AS A PULL-OUT-AND-KEEP SUPPLEMENT.

The matrix is a list of approximately 100 companies/organisations and the services/products that they offer, specifically to the wind energy industry.

AN EXTREMELY HELPFUL GUIDE
We have thoroughly enjoyed compiling the supplement. It will provide our readership with an extremely helpful guide where they can source the range of services and products, safe in the knowledge that the companies/organisations will meet their needs.

ENTHUSIASM
Visiting on more than a few occasions in the last 5 years, we found The Hull & Humber area forward looking and vibrant. Since the Siemens announcement however, the opportunities it will bring, the area has taken on a degree of enthusiasm unmatched across the wind energy sector throughout Europe and beyond.

PERSONAL THANKS
May I personally take this opportunity to thank everyone who has contributed – from government officials, both local and national, to the many companies/organisations, both large and small and of course the advice which we have received from the leaders in the industry. It is greatly appreciated – we could not have produced the supplement without you.

Duncan McGilvray
Editor | Wind Energy Network
