SUPPLY CHAIN MATRIX - EAST OF ENGLAND

WIND ENERGY NETWORK

East of England Supply Chain Matrix

THIS MATRIX HAS BEEN DESIGNED AS A PULL-OUT-AND-KEEP SUPPLEMENT

It is a list of over 80 companies and organisations and the services/products that they offer, specifically to the wind energy industry.

AN EXTREMELY HELPFUL GUIDE

We have thoroughly enjoyed compiling the supplement. It will provide our readership with an extremely helpful guide where they can source a range of services and products, safe in the knowledge that the companies and organisations will provide their requirements.

ENTHUSIASM

Since our last area focus, some two years ago, we have watched the East of England grow in stature and strength in the services they offer to the wind industry, particularly offshore.

You will read in their introduction to the East of England focus, as well as within this considerable feature in the magazine, the detail behind that statement; however we would like to mention our admiration in the way the area has pulled together, ensuring success in attracting investment on a global basis.

Opportunities continue with recent announcements on new offshore windfarms and existing windfarm extensions. We will therefore continue to feature this vibrant area, as and when necessary, throughout Europe and beyond.

PERSONAL THANKS

May we personally take this opportunity to thank everyone who has contributed – from government officials, both local and national, to the many companies and organisations, both large and small and of course the advice which we have received from the leaders in the industry. It is greatly appreciated – the team could not have produced the supplement without you.
