# **EAST OF ENGLAND**

### **SUPPLY CHAIN MATRIX**

This Matrix has been designed as a pull-out-andkeep supplement. It is a list of over 50 companies and organisations and the services/products that they offer, specifically to the wind energy industry

#### AN EXTREMELY HELPFUL GUIDE

We have thoroughly enjoyed compiling the supplement. It will provide our readership with an extremely helpful guide where they can source a range of services and products, safe in the knowledge that the companies and organisations will provide their requirements.

#### **ENTHUSIASM**

Since our last area focus, some two years ago, we have watched the East of England continue to grow in stature and strength in the services they offer to the wind industry, particularly offshore.

You will read in the introduction to the East of England focus, as well as within this feature in the magazine, the detail behind that statement; however we would

## Bringing oil and gas expertise to the renewables industry

Subsea cable services for the wind energy industry

- ♦ Design ♦ Routing

like to mention our admiration in the way the area has pulled together, ensuring success in attracting investment on a global basis.

Opportunities continue with recent announcements on new offshore windfarms and existing windfarm extensions. We will therefore continue to feature this vibrant area, as and when necessary, throughout Europe and beyond.

#### **PERSONAL THANKS**

May we personally take this opportunity to thank everyone who has contributed - from government officials, both local and national, to the many companies and organisations, both large and small and of course the advice which we have received from the leaders in the industry. It is greatly appreciated the team could not have produced the supplement without vou.

**Duncan McGilvray Editor** Wind Energy Network
